(*) Minimum charge. 30 minutes labour included. Extra labour charged at \$60/hr in 10 minute increments.

Play Condition: returns the instrument to play condition – these are usually one-off and straightforward repairs, such as the replacement of a single pad, the straightening of a bent key, replacing a headjoint cork, etc. This repair carries a 90 day warranty on repairs only. Please note that dent removal will never fall in this category.

Standard Service: recommended every 12 to 18 months. Instrument is disassembled and hand polished. Necessary pads, corks, springs and felts are replaced. Spring tension adjusted. Key regulation and height adjustment. Headjoint cork checked and adjusted, replaced only if necessary. Tenons checked for secure fit and adjusted if necessary. Keywork lubricated. Instrument leak tested and play tested. This service carries a 90 day warranty on new pads.

Overhaul: generally only needed once or twice in the lifetime of an instrument, and most likely never for school or beginner instruments. This really depends on the age of the instrument and how well it has been maintained over time. Same as a full service plus: all pads, corks and felts replaced, major dents and scratches removed, tone holes levelled/refaced, all springs replaced, bore/wood oiled for wooden instruments. This service carries a 1 year warranty on pads and a 90 days warranty on adjustments.

Please note: excessive dent work will incur a surcharge.
